DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

To have a general inventive concept under PCT rule 13.1, the inventions need to be linked by a special technical feature. The special technical feature that appears to link the claims is a humanized anti-Tag-72 antibody with human residues at certain positions (see claim 23). References, WO 97/26010 (July 1997, IDS #13) and Sha et al (Cancer Biotherapy 9:341-349, 1994, IDS #13) render the technical feature obvious because Sha et al teach humanized anti-TAG-72 antibodies and W) 97/26010 teach human residues at position 97. Therefore the technical feature recited in the claims is not a contribution over the prior art. Accordingly the groups set forth below are not so linked as to form a single general concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I claim(s) 1-35, 38-41, drawn to an antibody.

Group II, claim(s) 36-37, drawn to nucleic acids.

Group III, claim(s) 42, drawn to a method of treatment.

Art Unit: 1642

Group IV, claim(s) 43-47, drawn to a method of detecting cancer cells.

2. The inventions listed as Groups I-IV do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: As set forth above in view of the teachings from the references above the groups are not so linked as to form a single general concept under PCT Rule 13.1 because the technical feature shared by Groups I-IV is not special.

Two different products are presented in Group I and II. These two products do not share a common core structure, nor common property or activity. Groups III and IV are methods of using products. Group III requires treating cancer which is not required for the claimed method invention of Group IV. Conversely, Group IV requires the step of detecting cancer cells which is not required for the claimed method invention of Group III. Thus the inventions I-IV are patentably distinct.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter and different searches in the patent literature, restriction for examination purposes as indicated is proper.

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim

Art Unit: 1642

remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(I).

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Larry R. Helms, Ph.D., whose telephone number is (703) 306-5879. The examiner can normally be reached on Monday through Friday from 7:00 am to 4:30 pm, with alternate Fridays off. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Anthony Caputa, can be reached on (703) 308-3995. Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the Group receptionist whose telephone number is (703) 308-0196.

6. Papers related to this application may be submitted to Group 1600 by facsimile transmission. Papers should be faxed to Group 1600 via the PTO Fax Center located in Crystal Mall 1. The faxing of such papers must conform with the notice published in the Official Gazette, 1096 OG 30 (November 15, 1989). The CM1 Fax Center telephone number is (703) 308-4242.

Respectfully,
Larry R. Helms Ph.D.
